## SKILLS

**Languages & Frameworks:** JavaScript, Vue.js, HTML, CSS/SCSS, TailwindCSS, Node.js, Express.js, PostgreSQL, Jest, Vuex, Vue Test Utils

**Tools:** Git, NPM, Webpack, Google Analytics, Google Tag Manager, Figma

**Concepts & Methodologies:** CI/CD, UI/UX, Unit Testing, TDD, Agile (Scrum), Cross-Browser Compatibility, RESTful APIs

## WORK EXPERIENCE

**Front End Software Engineer** | Token of Trust (Minneapolis, MN) May 2021 - Oct 2023 (2.5 yr)

- **Led front end development** (incl. user interviews, usability tests) and post-delivery support for extension of identity verification workflow to support crypto-wallet verification, achieving **95% conversion rate**
- **Enhanced code architecture, maintainability and testability** of client portal and verification workflows by leading implementation of state management (**Vuex**) and unit testing framework (**Jest, Vue Test Utils**)
- **Improved performance and user experience of verification workflows** by migrating 20 server-side rendered pages to **Vue.js** single-page application, eliminating frequent re-rendering for data updates
- **Eliminated 80% of user complaints** about verification review turnaround time by leading development of 'progress tracker' feature that shows status of verification review in real time (**Vue.js, Node.js, Express.js**)
- **Improved conversion rate (by 10% in 3 months)** of migrated workflows by restructuring layouts with responsive, modern UI components, highlighting important information and addressing **cross-browser compatibility** issues (**Vue.js, SCSS**)
- **Reduced cost of sales team involvement** in plan selection process by designing and developing interface for plan recommendation wizard composed of multi-select component for users to select intended use-cases

**Associate Product Manager** | B.Vell Inc (Minneapolis, MN) Sept 2020 - May 2021 (7 mo)

- **Coordinated product development efforts** with contracted engineering team for 'All is Well' product, giving caregivers real time insights into health data of senior citizens through mobile app
- **Generated key workflows** for seamless end-to-end user interactions with product, including shipping and setup

**Front End Software Engineer Intern** | Chanl Health (Minneapolis, MN) June 2020 - Sept 2020 (3 mo)

- **Built 'Education Resources' section** of client portal to allow hospital staff to remotely assign educational articles to cardiac patients (**AngularJS**)
- **Eliminated time spent by hospital staff** in generating rehab post-session reports by automating generation process and implementing interface to initiate process and download reports

**Front End Software Engineer Intern** | Quill Security Technology (Minneapolis, MN) May 2019 - Dec 2019 (7 mo)

- **Designed and developed widgets** summarizing points of concern from risk data across buildings (**JavaScript, HTML, CSS**)
- **Created interactive components** to evaluate cost efficacy of adopting recommended security measures

**Front End Software Engineer Intern** | Portkey SEO Solutions (Minneapolis, MN) May 2018 - Aug 2018 (4 mo)

- **Boosted conversion rates** of client websites by revamping site content and improving responsiveness
- **Built custom UI components** for client WordPress sites, enhancing aesthetics and branding (**HTML, CSS**)

## EDUCATION:

- **BA Computer Science** | Macalester College (St Paul, MN) Completed in May 2020
